

Interest

My research interest is the application of **Deep Learning** algorithms in **Computer Vision** applications

Works

- Master thesis: Building of real time object detection and tracking by detection system for robot application based on Convolutional Neural Network
- Bachelor thesis: Analysis and comparative evaluation of image descriptors for depth sensors data and their application to robot localization

Nationality:

Italian

Date of birth:

07/09/1991

Education and experience

2016 - now – Ph.D in Advanced Humanoid and Robotics (IIT&unige)

2013 - 2015 – M.sc in Software and Automation Engineering (unipg)

2014 - 2015 – Internship In Machine Learning and Computer Vision (unipg)

2010 - 2013 – B.sc in Degree in Software and Electronics Engineering (unipg)
